Art Unit: 1756

1. The response of the applicant has been read and given careful consideration. The declaration of Rakesh VIG is sufficient to obviate the obviousness rejection. This declaration establishes that the dyes recited in the instant claims were derived from VIG and undercuts the position of the examiner.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2,3 and 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/418898 (US prepub 2004/0004922). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the copending application clearly embrace copy protected optical recording media using the claimed phenothiazines as these are fully encompassed by the claims of the co-pending application as evidenced by sections [0083-0104] of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

As of 04/09/07 the examiner has examined the active claims in both cases and the claimed subject matter is not distinct.

Art Unit: 1756

The examiner holds that the compounds recited in the instant claims are embraced by the language found in claim 9 of the co-pending application, specifically where R1- R6 are hydrogen, Y is alkylamino and X is an electron withdrawing group, such as those disclosed. Further, it is clear from figure 6 that that media incorporating dyes of instant claim 3 would be embraced by the language of the co-pending application.

Further, the USPTO does not have complete control the order of issuance of any patents, which would issue from these applications, so the applicant should submit a terminal disclaimer to obviate this rejection.

4. Claims 4 and 5 are allowable over the prior art of record. While 3-(Dimethylamino) phenothiazin-5-ium triiodide is a known compound, it is known as an intermediate for the formation of the dye compounds described in claim 3, not a colorant on its own.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
